Needs Licence Revoked

Aug 20th, 2013

This physician lies in order to get children taken away from their parents. She relies on junk science for her diagnoses. She will say other physicians opinions are wrong if it does not suit her conclusion. She smiles while hurting families. It is really sad, she must be stopped.

KEYTRUDA
(pembrolizumab) injection

KEYTRUDA is a prescription medicine used for previously treated non-small cell lung cancer.

Important Risk Information About KEYTRUDA

KEYTRUDA is a medicine that may treat your lung cancer by working with your immune system. KEYTRUDA can cause your immune system to attack normal organs and tissues in many areas of your body and can affect the way they work. These problems can sometimes become serious or life-threatening and can lead to death.

Call or see your doctor right away if you develop any symptoms of the following problem, or these symptoms get worse:

Lung problems (pneumonitis).

Symptoms of pneumonitis may include shortness of breath, chest pain, or new or
